

📍 City Future Lab, IIT Kharagpur (On-Site)

We're Hiring

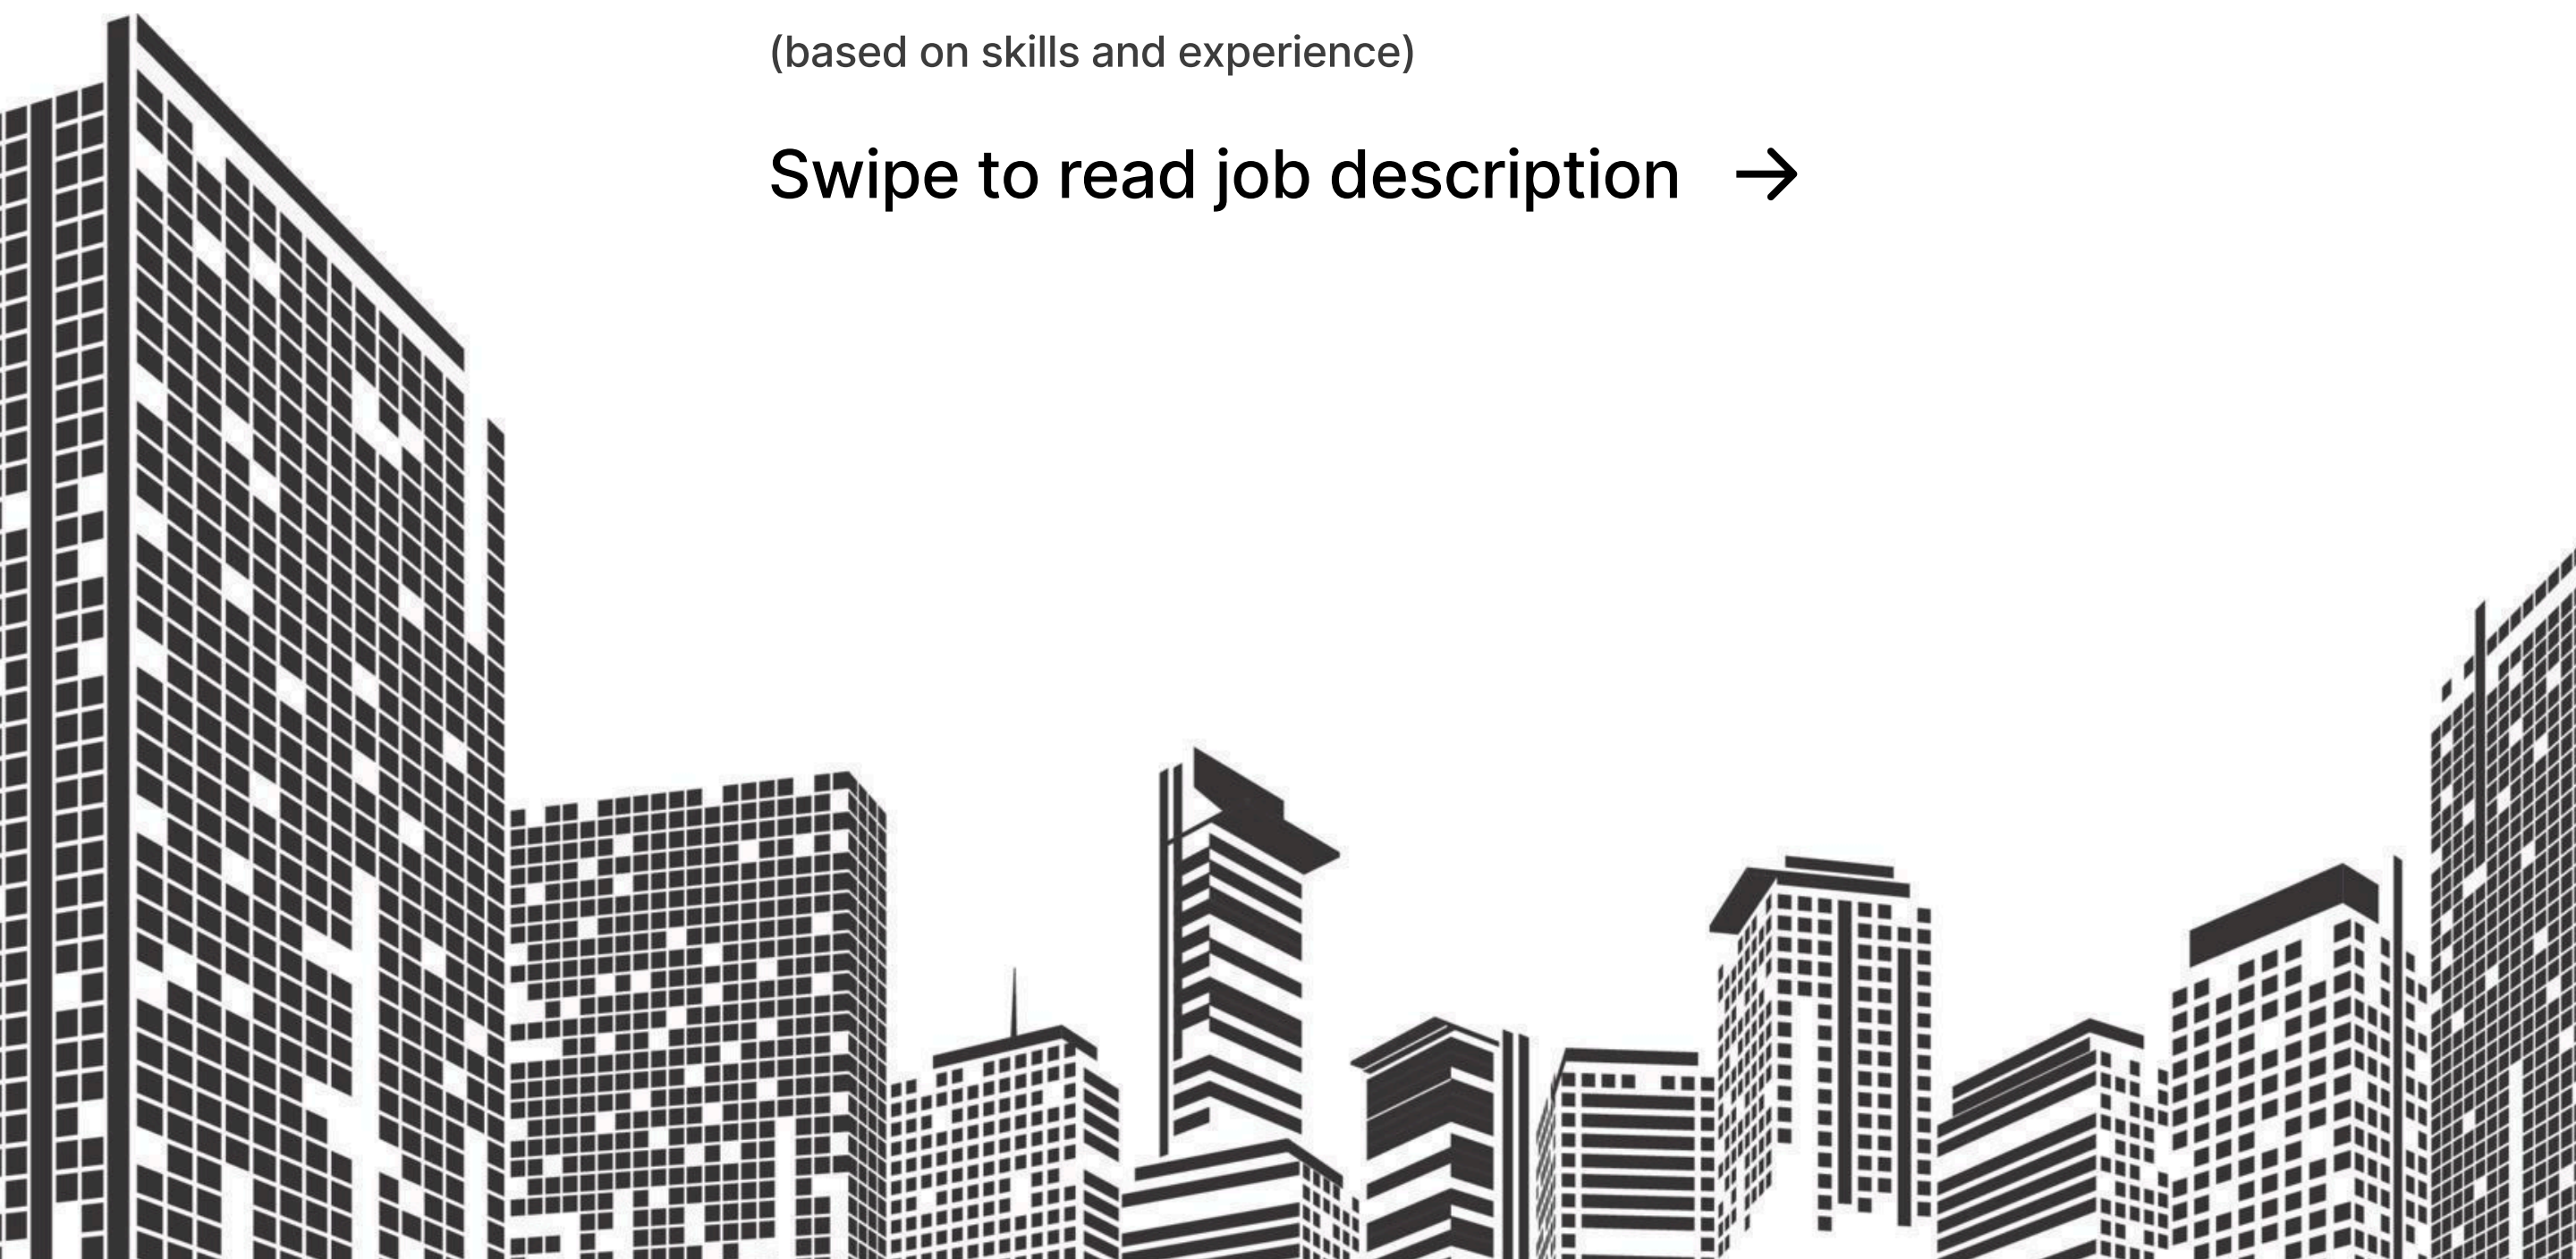

Product Designer

Experience : **1 year minimum**

Salary : **Up to 32,000/per month**

(based on skills and experience)

Swipe to read job description →

Qualifications and Skills

- Engineering background (Mechanical / Electrical / Robotics/Architect related fields)
- Strong interest in clean mobility, new technologies, and innovation-driven projects
- Hands-on experience with CAD tools, design, and prototyping
- Proficiency in SketchUp for 3D modeling; familiarity with tools like SolidWorks, Rhino, or Fusion 360 is a plus.
- Understanding of industrial design principles, ergonomics, materials, and fabrication with strong visualization, drafting, and communication skills.
- Knowledge of materials, manufacturing, and testing processes

Key Responsibilities

- Conceptualize, design, and prototype product components for e-mobility applications
- Collaborate with R&D and cross-functional teams to bring ideas from paper to production
- Conduct feasibility analysis, simulations, and performance testing
- Ensure product designs align with functionality, and scalability
- Support continuous improvements and innovation in product development cycles
